Subject: Fw: New comment alert from Butler Research LLC

## Dear Chairman Gensler:

I have been following multiple professional writers regarding many commodities for the past 20 years. There is no doubt in my mind

that COMEX silver trading has been manipulated to a greater degree than any of the others. Data has consistently revealed that

"middlemen and big banks" have been the most egregious. The most common mechanism by which these deeds have occurred is by

concentration, concentration and cooperative concentration plus.

I am forwarding Mr. Ted Butler most recent publication. This article is so comprehensive that I am not able to remove even one paragraph or add an additional sentence.

Please, address these "crimes in progress" over the years, and stop the manipulation.

Respectively submitted,

Edward E Gatz, MD, PhD
